## Company

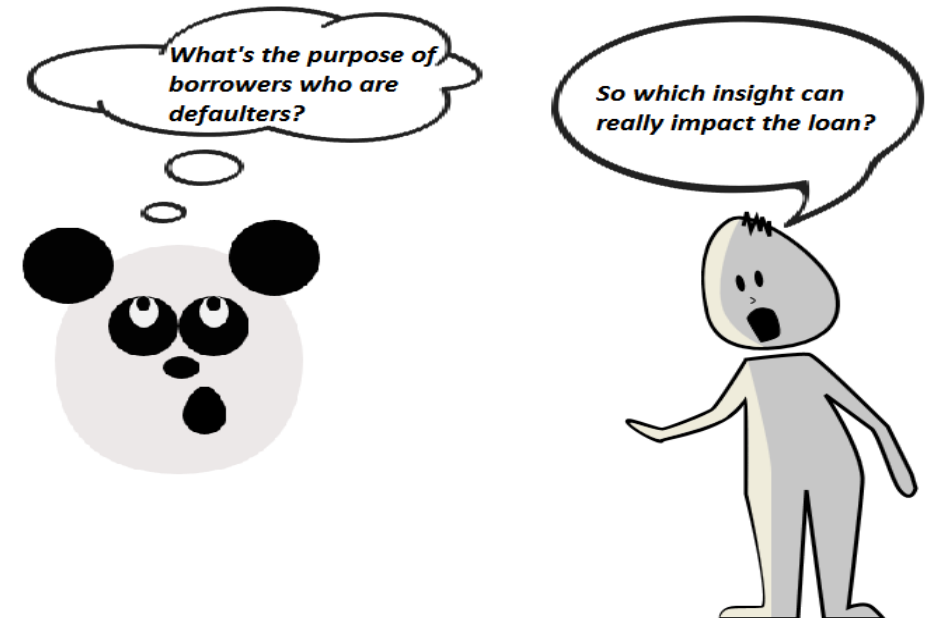

The **lending club** is the largest online loan marketplace, facilitating personal loans, business loans, and financing of medical procedures. Borrowers can easily access lower interest rate loans through a fast online interface.

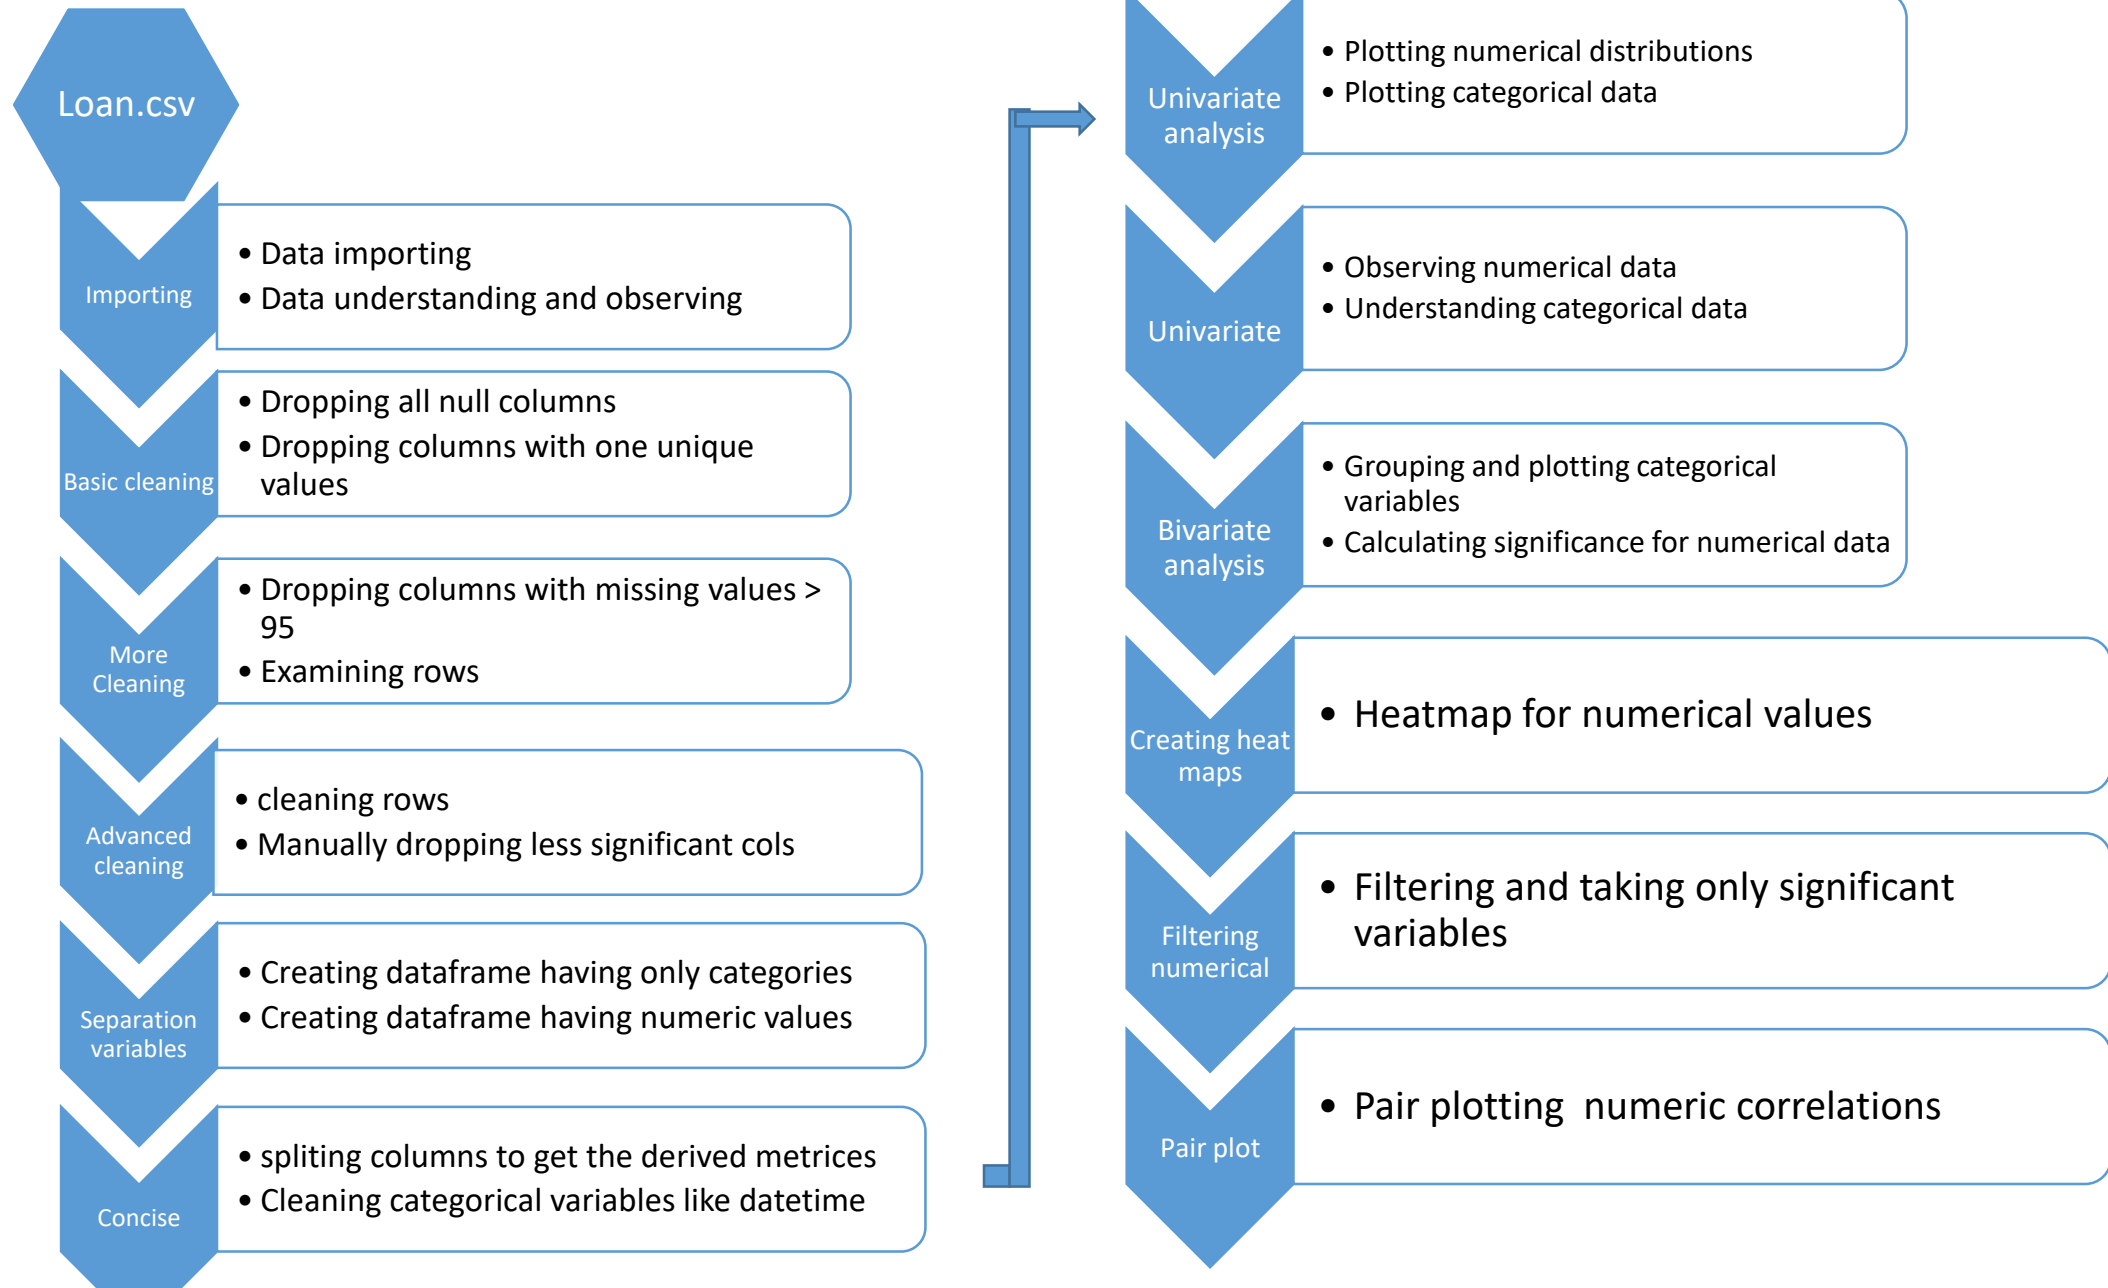

## Context

Lending club wants to find out the the company wants to understand the driving factors (or driver variables) behind loan default, i.e. the variables which are strong indicators of default. The company can utilise this knowledge for its portfolio and risk assessment.

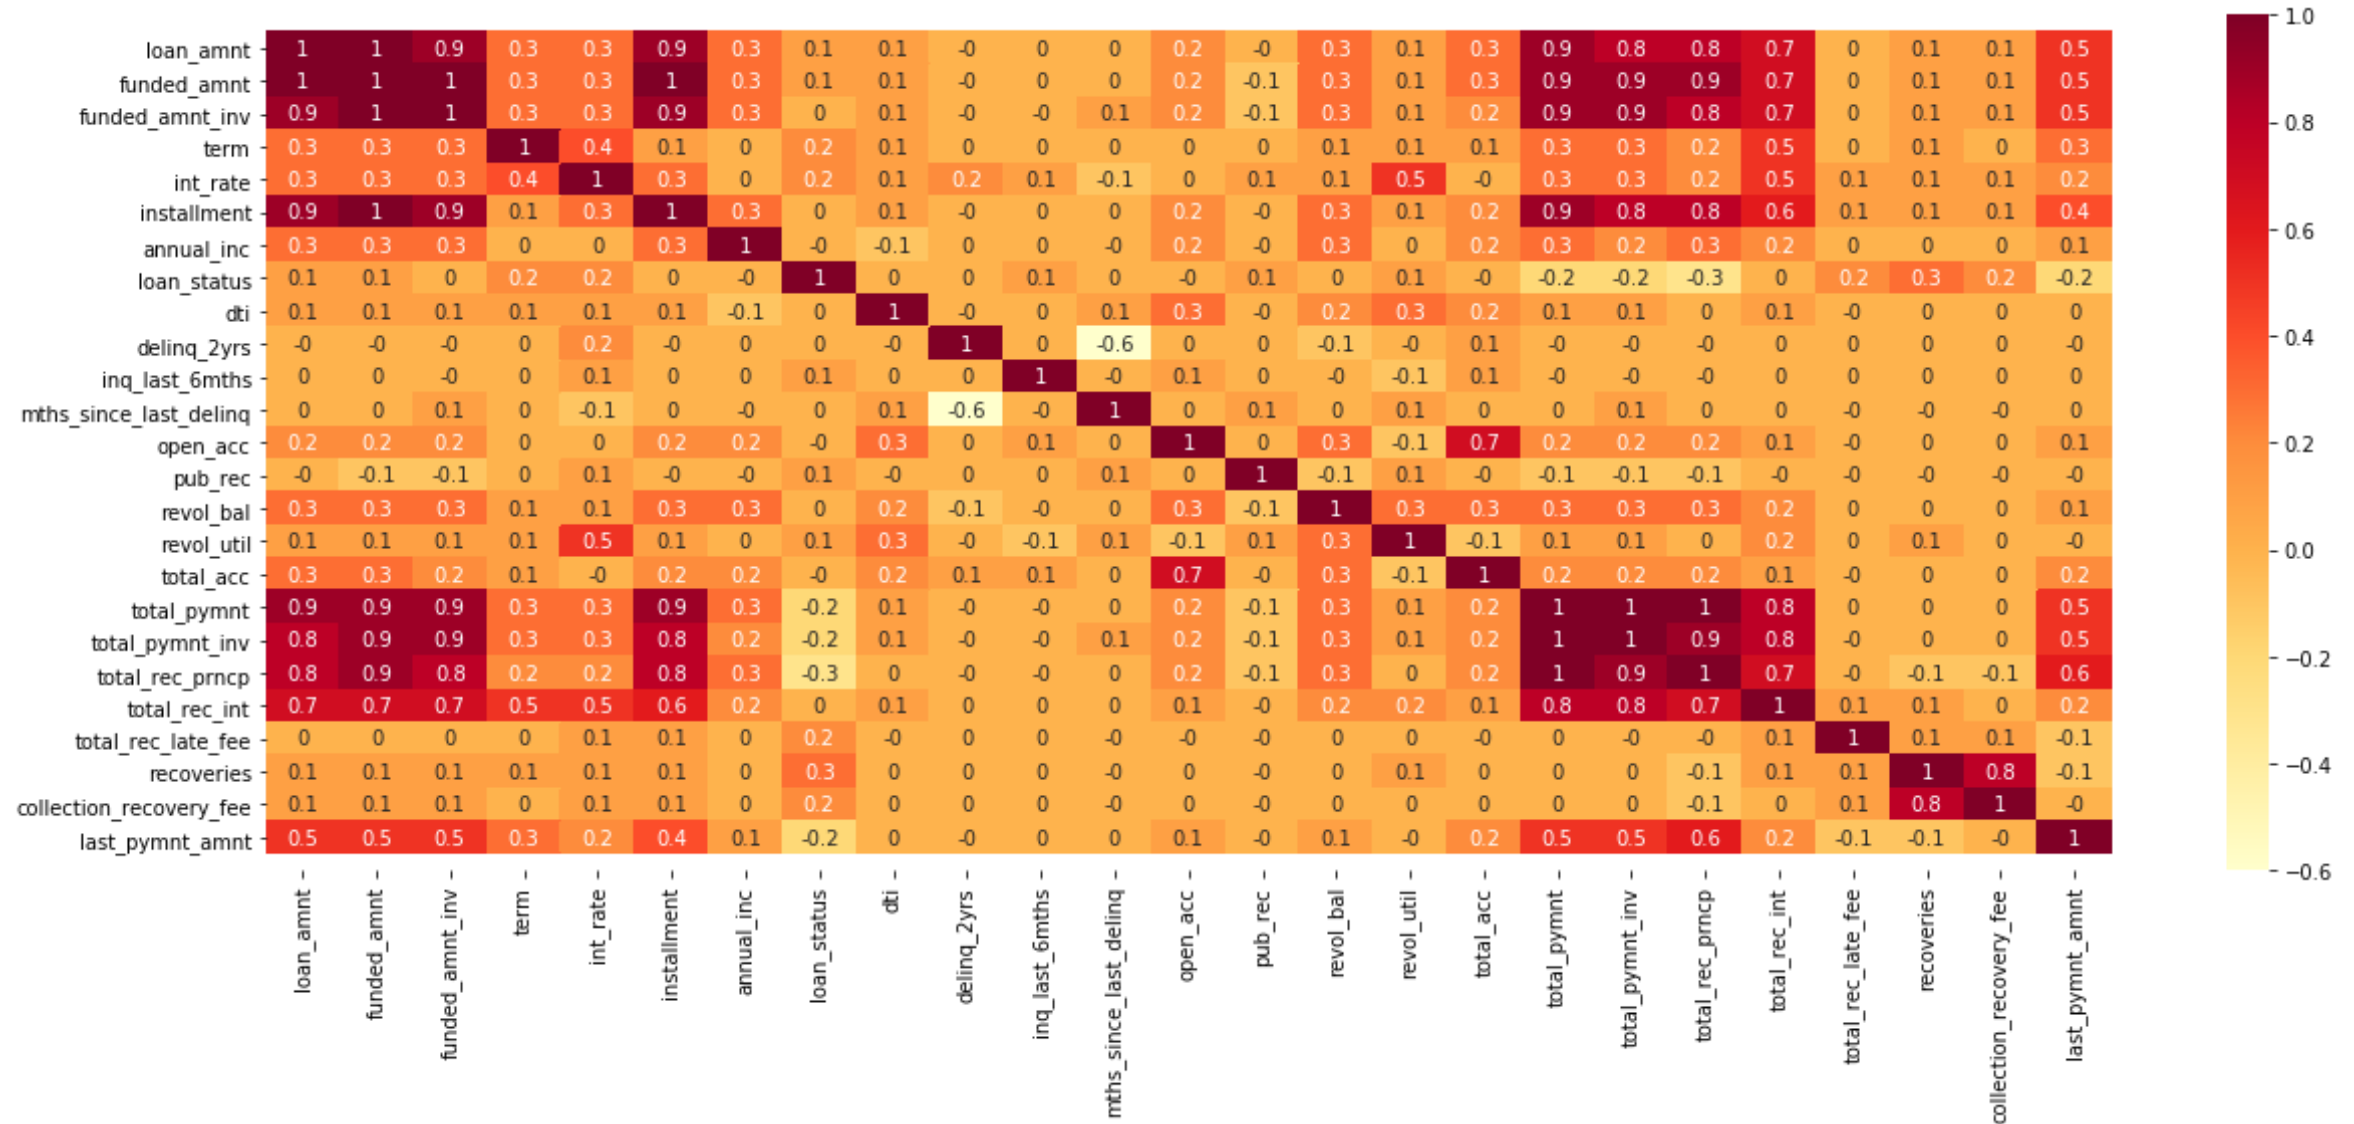

## Problem Statement

As a data scientist of Lending Club analyze the dataset containing information about past loan applicants using EDA to understand how Consumer attributes and Loan Attributes influence the tendency of default

## Heat Map For finding The Correlation

*How to figure this?*

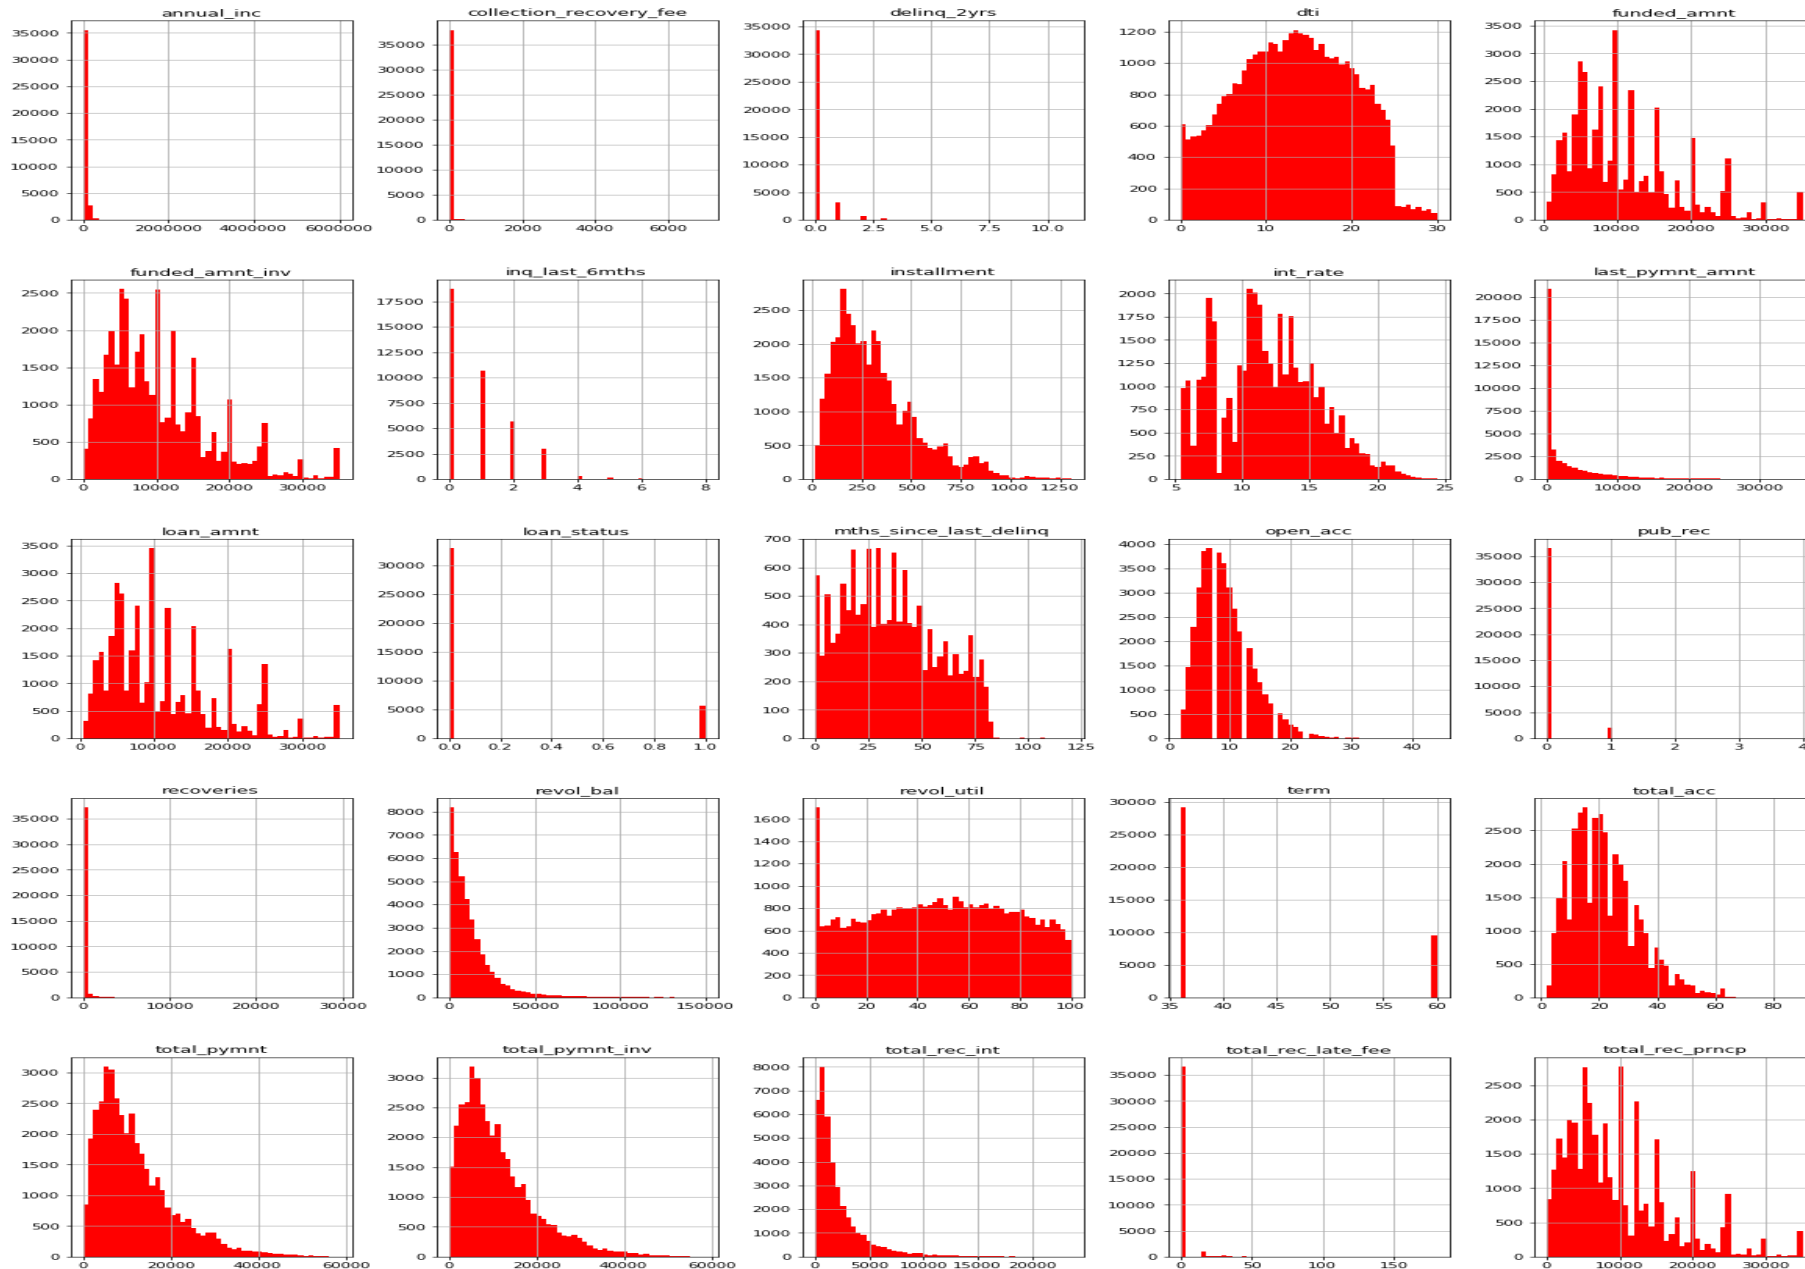

*What factors  
are driving this?*

*Why is the loss %  
going up ?*

**Lending Club**

# Loan Status Analysis (loan count versus all numerical variable)

*Do you really  
verify the  
borrowers?*

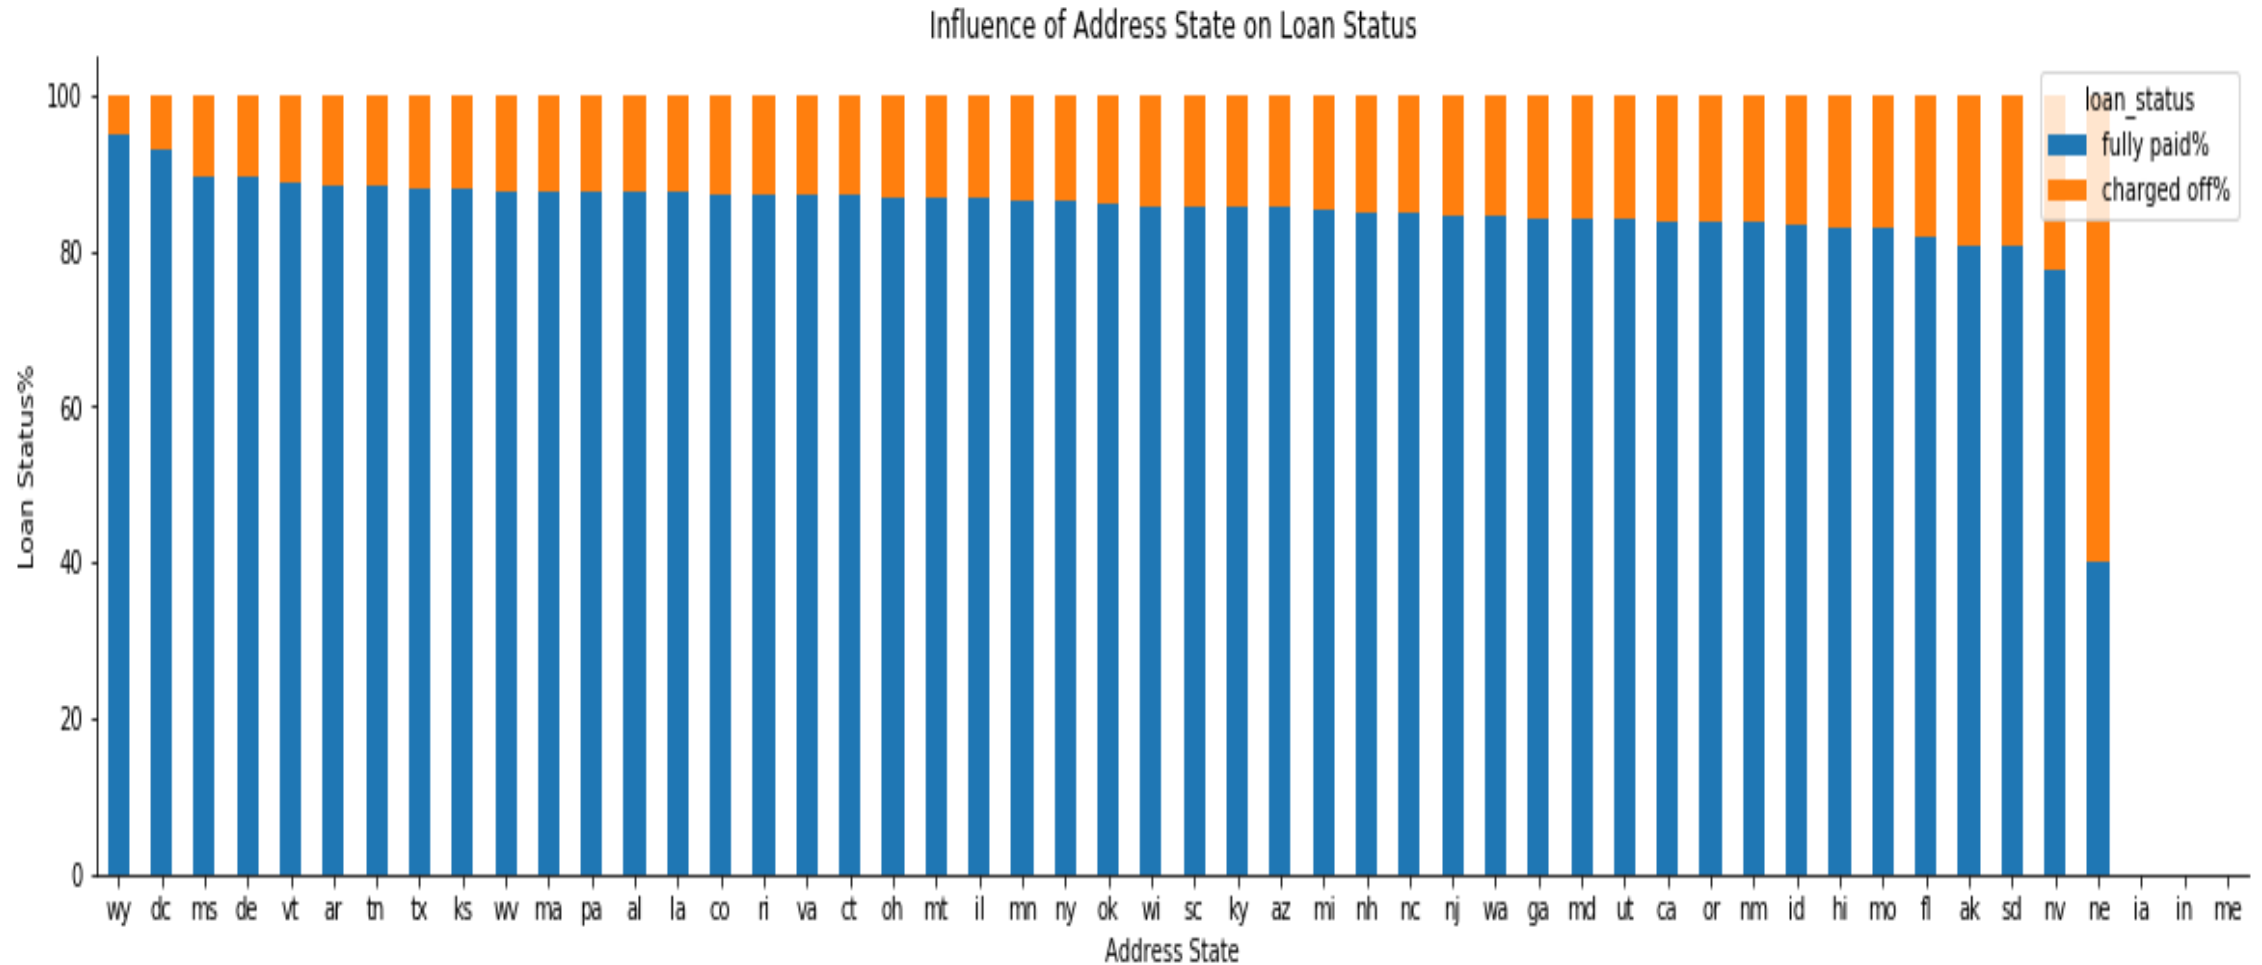

*Why do people  
forget to re-pay  
while on  
Vacations ?*

Influence of Verification Status on Loan Status

# Loan Status Analysis

SD,NV and NE has maximum number of defaulters

G grade has maximum number of defaulter

Subgrade F5 has maximum number of defaulter

Influence of Employment Length on Loan Status

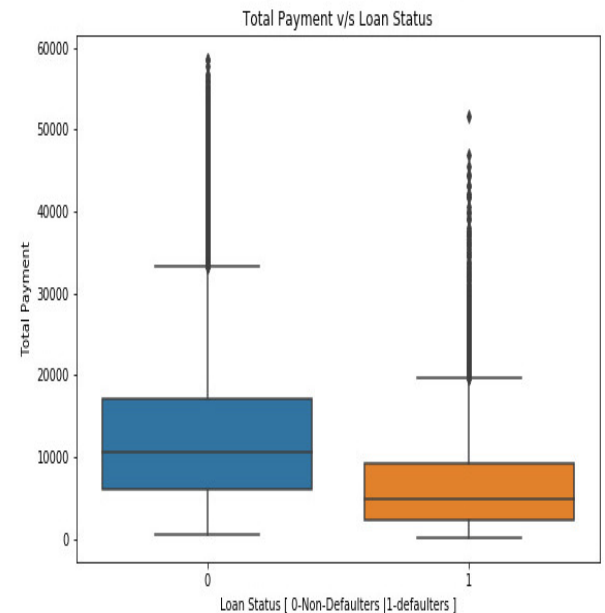

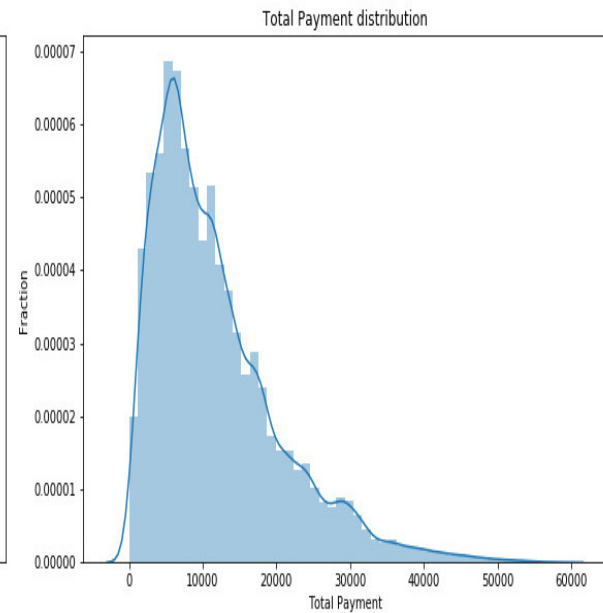

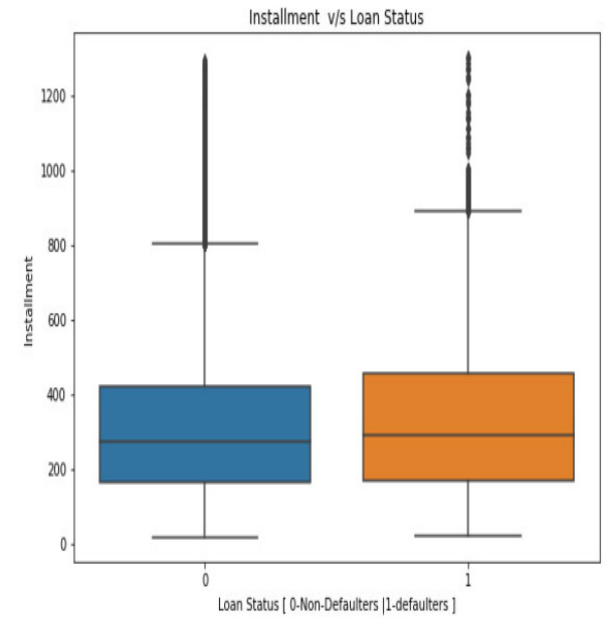

Influence of Annual Income on Loan Status

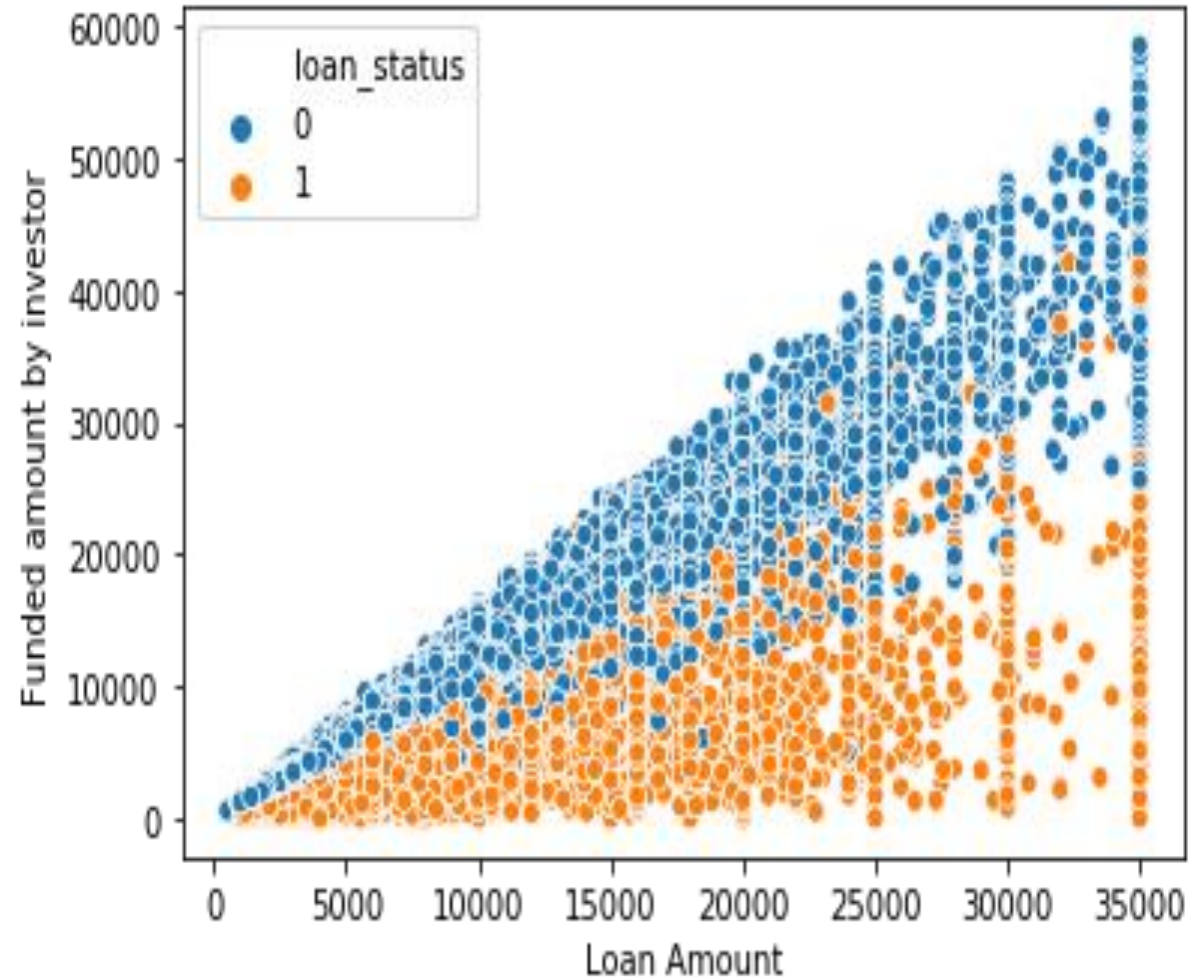

Very Low income comes with more default case

Employee experience doesn't have significant difference

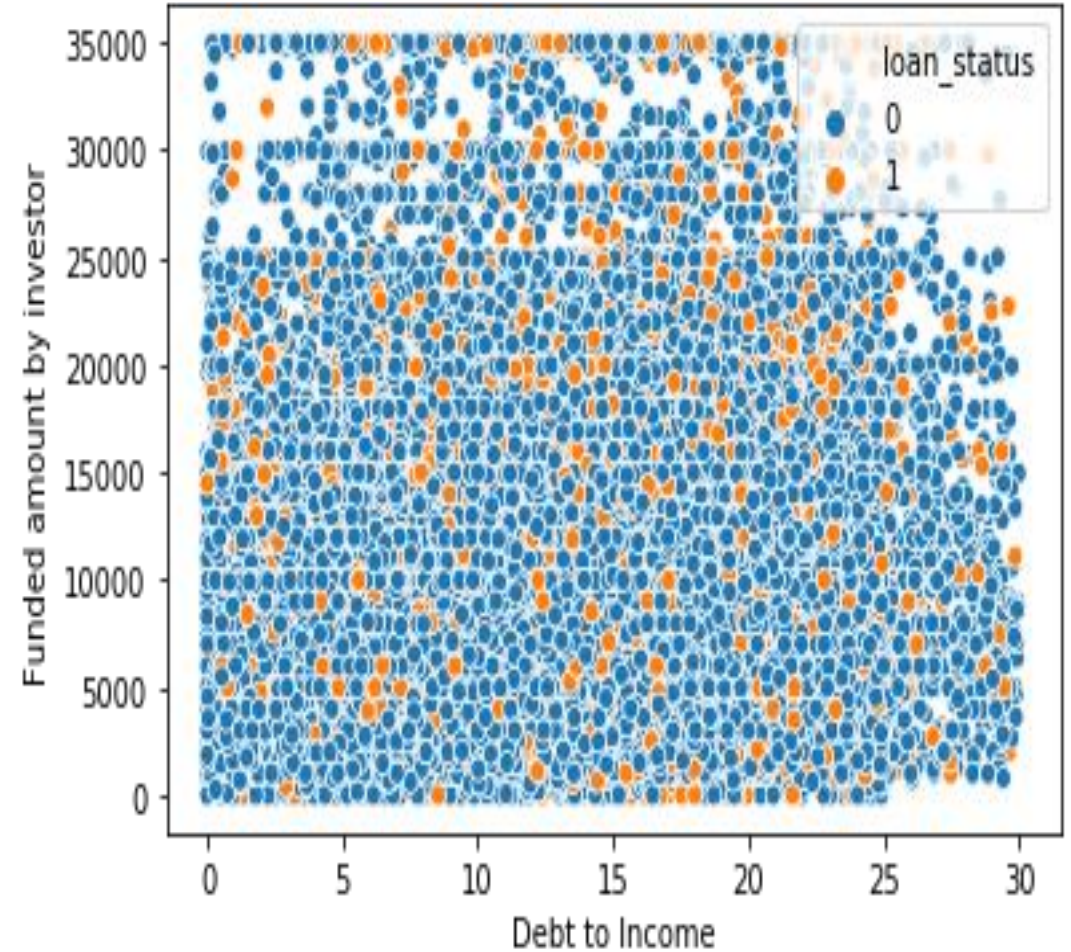

Loan Amount v/s Funded amount by investor

Loan Amount v/s Funded amount by investor

Influence of Loan amount asked by borrower vs Funded amount given on Loan Status

Loan amount asked and funded amount ratio impact on loan status

Very high length installment results in higher numbers of defaulting loan

Influence of installment Length on Loan Status

*Hey ! Look at the grades and the loan amount given !*

*Thats a sign of some system error ! Need bug fixing and design of newer schemes*

## Overall Analysis:

Surprisingly Verification Status : Verified has High number of Defaulters	With 60 month term : purpose with education has the higher defaulters
Grade 'G' has higher defaulters	Interest Rate has good impact on defaulters ; Higher the interest rate higher the defaulters
Subgrade 'F5' has higher defaulters	Debt to income havng average 15 dti has higher counts of defaulters
Borrowers taking loan on month on July defaults high	Higher installment has more defaulters
Home ownership : 'Other has slight higher impact on Default rate	With higher loan amount the funded amount by investor is dropping down
Employement length : 7 years and 10+ years shows higher number of defaulters	Medium and Very low acceptance percentage has higher count of defaulters
Term '60 months' has higher defaulters	Installment > 217.53 has higher defaulters
Small business have higher defaulters	Very low income ( less than 1000000.0 ) has higher number of defaulters
With 36 month term : purpose with small business has the higher defaulters	House ownership : Other has higher defaults for term 36 months

*So panda !  
Tell me the powerfull insight  
solution that we @Lending Club  
can implement in order to gain  
Business..  
We will be surely looking for  
reforms later..*

*Well here are some points I can recommend :*

- 1. More Verification required for approving loan amount higher than \$17,500 .*
- 2. Charging higher interest rates for loans with dti greater than equal to 15.*
- 3. Reduce approval of loans for lower grades (G , F & E)*
- 4. Verify and regulate the approvals for purpose: `Small Business`.*
- 5. Make newer schemes/regulations for approval of loans having low annual income than average income - \$68K.*
